DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 1 recites 'software for loading an operating system...an address masking driver operable to...'. These claims merely recite software per se, which is not permissible under the Examination Guidelines for Computers - Related Inventions. Claims 2 – 9 are rejected because of their dependence to claim 1.

3. Claims 18-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 18-20 recite 'A bootable medium...'. Thus, these claims merely recite a program per se, which is not permissible under the Examination Guidelines for Computers - Related Inventions. A way of correcting this is 'A computer readable medium...comprising computer readable instructions executed by a processor comprising instructions for...'

Allowable Subject Matter

4. Claims 10-17 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: Claims 10-17 are allowed because of the following limitations 'loading an address masking driver on the affected server wherein the address masking driver is operable to prevent access to the address of the storage device'.
